

Low maintenance. Lifetime beauty.

Certified TimberTech Pros.

A composite deck built by Golden Maple is not a weekend project — it's a precision-built outdoor living space designed to perform in Ontario's climate for decades. As certified TimberTech installers, we have access to the full product line and can offer the complete manufacturer warranty. Our structural framing exceeds Ontario Building Code, our surfaces are screw-free, and our finishes are built to the same standard as the rest of your outdoor living environment.

WHAT'S INCLUDED

- ✓ TimberTech Advanced PVC or Composite decking systems
- ✓ Code-exceeding structural framing — pressure-treated or steel
- ✓ Hidden fastener systems — completely screw-free surface
- ✓ Custom fascia boards & stair wrapping for a finished look
- ✓ 10-Year Golden Maple craftsmanship warranty
- ✓ Up to 50-Year TimberTech product warranty (fade, stain & scratch)

POPULAR ADD-ONS

- Glass or aluminum railing systems
- Integrated LED step & post lighting
- Built-in bench seating & planter boxes
- Outdoor kitchen integration on deck surface
- Under-deck drainage systems for covered storage

WHY GOLDEN MAPLE

Certified TimberTech Pros

We are certified TimberTech installers — meaning we've completed manufacturer training, meet their installation standards, and can offer the full product warranty. Not every contractor qualifies.

Screw-Free Surface

Every deck we build uses hidden fastener systems. No exposed screws, no future rust staining, no snagged clothing. A clean surface that looks as good in year 15 as it did on day one.

Code-Exceeding Framing

The deck board is only as good as what's underneath. We build structural frames that exceed Ontario Building Code requirements — the right joist spacing, beam sizing, and post footings for your specific load and span.

Up to 50-Year Product Warranty

TimberTech's Advanced PVC line carries up to a 50-year warranty against fading, staining, and scratching. Combined with our 10-Year craftsmanship warranty, your investment is protected for decades.

OUR PROCESS

01

Design & Permit

Site measurement, structural design, material selection, and building permit application handled through the Design Package.

02

Demolition & Footings

Existing structure removed if needed. Concrete footings poured to frost depth per Ontario code requirements.

03

Frame & Deck

Structural framing built to spec. TimberTech boards installed with hidden fasteners, fascia wrapped, stairs built.

04

Railings & Finish

Railing system installed, lighting integrated if included, final inspection and warranty documentation provided.

FREQUENTLY ASKED QUESTIONS

Composite vs. pressure-treated wood — what's the difference?

Pressure-treated wood requires annual sealing, staining, and maintenance — and still warps, splinters, and greys over time. TimberTech composite and PVC decking requires no sealing, no staining, and no annual maintenance. It holds its colour and surface integrity for decades, and the long-term cost of ownership is significantly lower.

What does TimberTech certification mean?

TimberTech certifies contractors who have completed their professional training program and meet their installation standards. Certified installers can offer the full manufacturer warranty — including up to 50 years on Advanced PVC products. An uncertified installer cannot offer this coverage, regardless of what they tell you.

How long does installation take?

A typical deck project takes 1–3 weeks depending on size, complexity, and permit timelines. We provide a detailed project schedule before work begins so you know exactly what to expect.
