

Architectural precision. Built to last.

Engineered for Ontario's freeze-thaw.

Your outdoor space is an extension of your home — and it deserves the same level of structural integrity. Golden Maple's interlocking stone and patio installations are engineered from the ground up for Simcoe County's demanding climate. Every project begins with a deep compacted aggregate base, laser-graded drainage, and premium stone from Unilock, Techo-Bloc, or natural quarried sources. The result is a surface that holds its form, drains properly, and looks exceptional for decades.

WHAT'S INCLUDED

- ✓ 12–16" compacted aggregate base for Ontario freeze-thaw stability
- ✓ Laser-guided grading & positive drainage planning
- ✓ Premium Unilock, Techo-Bloc, or natural stone materials
- ✓ High-performance polymeric sand — Romex Ecofine
- ✓ Concrete edge restraints on all perimeter edges
- ✓ 10-Year Sink & Settlement Warranty

POPULAR ADD-ONS

- Porcelain paver systems (large-format, low-maintenance)
- Natural stone accents & feature inlays
- In-Lite low-voltage landscape lighting integration
- Fire pit or fire feature integration
- Permeable paving systems for drainage-sensitive lots

WHY GOLDEN MAPLE

Engineering-Grade Base

Every patio begins with a 12–16" compacted aggregate base — far exceeding the industry standard. This is what separates a patio that lasts from one that shifts in year two.

10-Year Sink & Settlement Warranty

We back our work with a decade of coverage. If it moves, we fix it. No fine print, no exceptions.

Certified Material Partners

We work exclusively with Unilock, Techo-Bloc, and premium natural stone suppliers — giving you access to the full product range with professional pricing.

Laser-Guided Precision

Every project is graded with laser levels to ensure proper drainage away from your home and zero pooling — a detail most contractors skip.

OUR PROCESS

01

Design & Consult

On-site assessment, 3D rendering, material selection, and full itemized quote through our \$2,000 Design Package.

02

Excavation & Base

Precision excavation to depth, compacted aggregate base installation, and laser-verified drainage grading.

03

Installation

Stone laying, cutting, and fitting by our certified crew. Polymeric sand and edge restraints locked in.

04

Final Inspection

Full walkthrough, warranty documentation, and care instructions delivered before we leave the site.

FREQUENTLY ASKED QUESTIONS

How deep is your base?

We install 12–16" of compacted aggregate — significantly deeper than the 6–8" common in the industry. This is the single most important factor in preventing frost heave and settling in Ontario's climate.

How long will my patio last?

A properly installed interlocking patio with an engineered base should last 25–40+ years. Our 10-Year Sink & Settlement Warranty reflects our confidence in that longevity.

What does the warranty cover?

Our 10-Year Sink & Settlement Warranty covers any movement, sinking, or heaving of the installed surface. We return, re-excavate if needed, and restore the affected area at no cost to you.
